SUMMARY

I am a Business Information Technology (BIT) graduate and full-stack developer with 2–3 years of course-related and personal project experience building web and mobile apps using React, Node.js, Firebase, Angular, Javascript and other technologies. I communicate fluently in English and French.

My diverse background includes work as a caterer managing large events, an independent QNET representative developing sales and client engagement skills, and a rugby analytics statistician applying data analysis for performance insights.

Key skills:

- Full-stack development & debugging
- Data analysis & rugby statistics
- Cold calling & direct sales
- Market research & customer relations
- Bilingual communication & project planning
- Project Planning & Execution

I excel at connecting with people, understanding needs, and delivering effective solutions, whether through software, service, sales, or data. I'm passionate about driving results and exceeding expectations.

TECHNICAL SKILLS

Programming Languages:
Python, JavaScript, PHP, C#, SQL, HTML, CSS

Frameworks & Libraries: jQuery

Design & UI Tools: Figma (UI/UX Design), Canva

Version Control & DevOps: Git, GitHub, Microsoft Azure

Database & Backend: Firebase, SQL

Productivity Tools: Microsoft Excel, Microsoft Office Suite (Word, Excel, Outlook)

SOFT SKILLS

- Strong attention to detail and accuracy
- Quick to learn new tools, frameworks, and systems
- Adaptable in fast-changing environments
- Collaborative team player with effective communication skills
- Proactive problem-solver with a hands-on approach
- Able to manage time effectively and meet deadlines
- Self-motivated with a strong work ethic
- Confident in training and supporting others
- Resilient and driven to grow through challenges

PROFESSIONAL EXPERIENCE

IT Assistant | My Bizz Space Johannesburg

June 2019-December 2019

- Installed and configured POS software for a new retail furniture store, ensuring all systems were fully operational for launch.
- Captured, organized, and uploaded product inventory data into the system, maintaining accuracy and consistency across digital listings.
- Provided initial technical support and training to staff on using the POS system for sales and inventory management.
- Assisted in streamlining store operations by digitizing product entry and implementing a structured inventory database.

Rugby Analytics – Johannesburg**June 2022 – September 2022**

- Collected and analyzed in-game and post-match data for rugby teams, including player performance, match statistics, and team metrics.
